This remarkable and monumental book at last provides a comprehensive answer to the age-old riddle of whether there are only a small number of 'basic stories' in the world. Using a wealth of examples, from ancient myths and folk tales via the plays and novels of great literature to the popular movies and TV soap operas of today, it shows that there are seven archetypal themes which recur throughout every kind of storytelling. But this is only the prelude to an investigation into how and why we are 'programmed' to imagine stories in these ways, and how they relate to the inmost patterns of human psychology. Drawing on a vast array of examples, from Proust to detective stories, from the Marquis de Sade to E.T., Christopher Booker then leads us through the extraordinary changes in the nature of storytelling over the past 200 years, and why so many stories have 'lost the plot' by losing touch with their underlying archetypal purpose. Booker analyses why evolution has given us the need to tell stories and illustrates how storytelling has provided a uniquely revealing mirror to mankind's psychological development over the past 5000 years. This seminal book opens up in an entirely new way our understanding of the real purpose storytelling plays in our lives, and will be a talking point for years to come.

Writing is not a subject; it is part of reading, of speaking, and of listening. Being a writer means being a reader, articulating stories and characters, listening to tales and learning from other writers. Through teaching exciting and engaging lessons you can help children to discover stories, create worlds, record events, mould characters and inspire each other as writers. Inspiring Writing in Primary Schools helps you to teach writing and to know what a good writing lesson looks and feels like. It gives you all the background theory you need to encourage purposeful writing across the curriculum. It includes exemplar lessons and offers them alongside a detailed exploration of what makes them good, and the theory behind them. As a teacher or trainee teacher, you can respond more imaginatively to the way you approach and teach writing. This text will help you to seize the opportunity of the new curriculum and inspire fabulous writing in your classroom. "Packed with accessible advice, engaging examples of research-informed practice and new ideas for ways to involve and support young writers, it offers primary teachers a breath of fresh air. Emerging from the memorable work of BookTrust's Everybody Writes initiative (which was co-led by Liz Chamberlain) and drawing on her own doctoral research (which involved exploring three young writers' practices at home and at school), the resultant mix of practice and theory - theory and practice is very energising. The authors take a real-world view of writing and recognise and respect each child as a writer and each teacher as a professional - a potentially creative pedagogue." - Teresa Cremin

James's epistle is usually remembered for being very practical and for inviting its readers to acts of mercy and compassion. And yet, the same letter also claims that it is not possible to love God and to love "the world." In other words, James encourages his readers to develop two seemingly opposite attitudes at the same time: to reject the world and to be involved in it. Vincent Hirschi shows that James contains crucial insights on how the church can be at the same time a positive social force and a prophetic voice challenging the society she serves. Through careful exegesis and attention to details, he explores the relationships between the personal and communal dimensions of faith, on the interplay between development of character and social action, and proposes a detailed analysis of the role of the church in James's letter.

Ali Pasha of Ioannina (c1750-1822), the Ottoman-appointed governor of the northern mainland of Greece, was a towering figure in Ottoman, Greek, and European history. Based on an array of literatures, paintings, and musical scores, this is the first English-language critical biography about him in recent decades. K. E. Fleming shows that the British and French diplomatic experience of Ali was at odds with the "orientalist" literatures that he inspired. Dubbed by Byron the "Muslim Bonaparte," Ali enjoyed a position of diplomatic strength in the eastern Adriatic; in his attempt to secede from the Ottoman state, he cleverly took advantage of the diplomatic relations of Britain, Russia, France, and Venice. As he reached the peak of his powers, however, European accounts of him portrayed him in ever more "orientalist" terms—as irrational, despotic, cruel, and undependable. Fleming focuses on the tension between these two experiences of Ali—the diplomatic and the cultural. She also places the history of modern Greece in the context of European history, as well as that of Ottoman decline, and demonstrates the ways in which contemporary European visions of Greece, particularly those generated by Romanticist philhellenism, contributed to a unique form of "orientalism" in the south Balkans. Greece, a territory never formally colonized by Western Europe, was subject instead to a surrogate form of colonial control—one in which the country's history and culture, rather than its actual land, was annexed, invaded, and colonized.
