A Bigger Prize turns that assumption on its head. Not only does Heffernan provide evidence that competition is not as productive as it is often touted to be, she also provides inspiring examples that show what has already been accomplished As an undergrad enrolled in Game Theory class, there was a lot of talk about competition vs. cooperation.

A Bigger Prize: When No One Wins Unless Everyone Wins ... "A Bigger Prize" tells a fictional story of the boxing world in the 1940s and what the sport meant to both blacks and whites of the time. It considers the question of whether Elegant Raines's "bigger prize" is the world's heavyweight championship-or something outside the ring more violent than boxing and its reward.

A Bigger Prize (2014) explains how competition is holding us back. These blinks demonstrate how our competitive schools, economy and society believed to produce higher grades, lower prices and better results are actually stifling collaboration and preventing us from realizing our full potential.

A Bigger Prize. There was an experiment made by scientists called the Cookie Experiment. They each placed a cookie in front of a child and gave them a set of rules. One was that they have to wait for the scientist to return at a set time; and another was that they had the option to either eat the cookie now or later.

Prizes up to \$500 may be claimed at any Nebraska Lottery retailer or by mail by signing the back of the ticket and mailing it to the Nebraska Lottery Prize Claim. Prizes between \$501 and up to \$19,999 should be claimed by mail: complete and sign the back of the ticket, fill out the Prize Claim Form , and include a copy of a valid photo ID.

The Olympics. X-Factor. The Rich List. The Nobel Prize.Everywhere you look: competition - for fame, money, attention, status. Being top seems to be everything - but what is it costing all of us? We depend on competition and expect it to identify the best, make complicated decisions easy and to motivate the lazy and inspire the dreamers. But, as Margaret Heffernan shows in this eye-opening look at competition, competition regularly produces just what we don't want: rising levels of fraud, cheating, stress, inequality and political stalemate. Siblings won't speak to each other. Children burn out at school. Doping proliferates among athletes. Auditors and fund managers go to jail for insider trading. Winners seem to take all while the desire to win consumes all, inciting panic and despair. We now know that competition often doesn't work, that the best do not always rise to the top and the so-called efficiency of competition creates a great deal of waste. So what are our alternatives? What are the skills needed for creative collaboration and how do we hone them? Talking to scientists, musicians, athletes, entrepreneurs and executives, in the follow-up to her bestselling Willful Blindness, Margaret Heffernan has discovered that, around the world, individuals and organizations are finding creative, cooperative ways to work that don't pit people against each other but support them in their desire to work together. While the rest of the world remains mired in pitiless sniping, racing to the bottom, the future belongs to the people and companies who have learned that they are greater working together than against one another. Some call that soft but it's harder than anything they've done before. They are the real winners, sharing a bigger prize.

The Olympics. Britain's Got Talent. The Rich List. The Nobel Prize. Everywhere you look: competition - for fame, money, attention, status. We depend on competition and expect it to identify the best, make complicated decisions easy and, most of all, to motivate the lazy and inspire the dreamers. How has that worked out so far? Rising levels of fraud, cheating, stress, inequality and political stalemates abound. Siblings won't speak to each other they're so rivalrous. Kids can't make friends because they don't want to cede their top class ranking to their fellow students. (Their parents don't want them to either.) The richest men in the world sulk when they fall a notch or two in the rich list. Doping proliferates among athletes. Auditors and fund managers go to jail for insider trading. Our dog-eat-dog culture has decimated companies, incapacitated collaborators and sown distrust. Winners take all while the desire to win consumes all, inciting panic and despair. Just as we have learned that individuals aren't rational and markets aren't efficient but went ahead operating as though they were, we now know that competition quite regularly doesn't work, the best do not always rise to the top and the so-called efficiency of competition throws off a very great deal of waste. It might be comforting to designate these 'perverse outcomes' but as aberrations mount, they start to look more like a norm. It doesn't have to be that way. Around the world, individuals and organizations are finding creative, collaborative ways to work that don't pit people against each other but support them in their desire to work together. While the rest of the world remains mired in pitiless sniping, racing to the bottom, the future belongs to the people and companies who have learned that they are greater working together than against one another. Some call that soft but it's harder than anything they've done before. They are the real winners.

Get into the best schools. Land your next big promotion. Dress for success. Run faster. Play tougher. Work harder. Keep score. And whatever you do—make sure you win. Competition runs through every aspect of our lives today. From the cubicle to the race track, in business and love, religion and science, what matters now is to be the biggest, fastest, meanest, toughest, richest. The upshot of all these contests? As Margaret Heffernan shows in this eye-opening book, competition regularly backfires, producing an explosion of cheating, corruption, inequality, and risk. The demolition derby of modern life has damaged our ability to work together. But it doesn't have to be this way. CEOs, scientists, engineers, investors, and inventors around the world are pioneering better ways to create great products, build enduring businesses, and grow relationships. Their secret? Generosity. Trust. Time. Theater. From the cranberry bogs of Massachusetts to the classrooms of Singapore and Finland, from tiny start-ups to global engineering firms and beloved American organizations—like Ocean Spray, Eileen Fisher, Gore, and Boston Scientific—Heffernan discovers ways of living and working that foster creativity, spark innovation, reinforce our social fabric, and feel so much better than winning.

When trainer Frank (Black Machine) Whaley of View Point, Texas, dies of a heart attack in 1946, Elegant Raines, an eighteen-year-old black prizefighter, must find a new trainer. Raines calls on Leemore (Pee-Pot) Manners, a boxing trainer who lives in Longwood, West Virginia. Any honest man would say Pee-Pot knows more about boxing than anyone alive—whether that man is black or white. Raines's goal is to become the heavyweight champion of the world. Under Pee-Pot's tutelage Raines wins not only the middleweight championship, but the light heavyweight championship, marking him as one of the greatest fighters of his time. During his quest for the title, Raines falls in love with Gem Loving, a pastor's daughter whose father, Pastor Embry O. Loving, maintains a dim view of fighters. Gem must fight for Raines in ways her father will condemn. A Bigger Prize tells a fictional story of the boxing world in the 1940s and what the sport meant to both blacks and whites of the time. It considers the question of whether Elegant Raines's (bigger prize) is the world's heavyweight championship—or something outside the ring more violent than boxing and its reward.

This new edition has the answers to every slot enthusiast's burning questions: What machines are likely to pay off? Does it make a difference if the game is on video instead of having physical reels? Is a machine ever due to hit? Can the casino decide who wins? Can you gain an advantage over the slots? About The Author: John Grochowski is a best-selling gambling author who resides in Chicago.

The Prize recounts the panoramic history of oil -- and the struggle for wealth power that has always surrounded oil. This struggle has shaken the world economy, dictated the outcome of wars, and transformed the destiny of men and nations. The Prize is as much a history of the twentieth century as of the oil industry itself. The canvas of this history is enormous -- from the drilling of the first well in Pennsylvania through two great world wars to the Iraqi invasion of Kuwait and Operation Desert Storm. The cast extends from wildcatters and rogues to oil tycoons, and from Winston Churchill and Ibn Saud to George Bush and Saddam Hussein. The definitive work on the subject of oil and a major contribution to understanding our century, The Prize is a book of extraordinary breadth, riveting excitement -- and great importance.

Tom Swift has enthralled generations of children with his amazing adventures. So return to a simpler time, put away your cynicism, and dust off your sense of wonder, because you're off on a series of grand adventures! Included here are Tom Swift and His Submarine Boat (Or under the Ocean for Sunken Treasure), Tom Swift and His Electric Runabout (Or the Speediest Car on the Road), and Tom Swift and His Wireless Message (Or the Castaways of Earthquake Island).

Historians have long viewed President John Tyler as one of the nation's least effective heads of state. In President without a Party—the first full-scale biography of Tyler in more than fifty years and the first new academic study of him in eight decades—Christopher J. Leahy explores the life of the tenth chief executive of the United States. Born in the Virginia Tidewater into an elite family sympathetic to the ideals of the American Revolution, Tyler, like his father, worked as an attorney before entering politics. Leahy uses a wealth of primary source materials to chart Tyler's early political path, from his election to the Virginia legislature in 1811, through his stints as a congressman and senator, to his vice-presidential nomination on the Whig ticket for the campaign of 1840. When William Henry Harrison died unexpectedly a mere month after assuming the presidency, Tyler became the first vice president to become president because of the death of the incumbent. Leahy traces Tyler's ascent to the highest office in the land and unpacks the fraught dynamics between Tyler and his fellow Whigs, who ultimately banished the beleaguered president from their ranks and stymied his election bid three years later. Leahy also examines the president's personal life, especially his relationships with his wives and children. In the end, Leahy suggests, politics fulfilled Tyler the most, often to the detriment of his family. Such was true even after his presidency, when Virginians elected him to the Confederate Congress in 1861, and northerners and Unionists branded him a traitor president. The most complete accounting of Tyler's life and career, Leahy's biography makes an original contribution to the fields of politics, family life, and slavery in the antebellum South. Moving beyond the standard, often shortsighted studies that describe Tyler as simply a defender of the Old South's dominant ideology of states' rights and strict construction of the Constitution, Leahy offers a nuanced portrayal of a president who favored a middle-of-the-road, bipartisan approach to the nation's problems. This strategy did not make Tyler popular with either the Whigs or the opposition Democrats while he was in office, or with historians and biographers ever since. Moreover, his most significant achievement as president—the annexation of Texas—exacerbated sectional tensions and put the United States on the road to civil war.
