In this gorgeous, aspirational work, Burns, editor-in-chief of *Kinfolk* magazine, collects stories about nature as nourishment along with photographs from homes across the globe to inspire people to bring more nature into their own abodes. . . . Expertly evoking a mood of understated luxury, this stunning spread will have design junkies drooling. Publishers Weekly A gardener with a secret oasis on a Parisian rooftop. An artist making faux flowers to brighten Manhattan apartments. A family of ranchers rewilding the American outback. Anchored around the idea of nature as nourishment, *The Kinfolk Garden* explores lush gardens and plant-filled homes around the world and introduces the inspiring people who coax them into bloom. Through visits to friends old and new, the *Kinfolk* team learns the secrets to a good garden, and what good a garden can do for our self-care, creativity and communities. Though many of the people we meet along the way champion the idea of following natural instincts rather than a set of prescriptive garden rules, there are practical tips throughout the book that offer advice on everything from growing your own produce to foraging for artful arrangements to simply keeping your houseplants alive a little longer than usual. *The Kinfolk Garden* is an invitation to engage with nature—to care for it, create with its beauty and cultivate new relationships around it—and offers inspiration and guidance to anyone looking to bring a little more greenery into their life.

The next twenty years will be completely unlike the last twenty years. The world is in economic crisis, and there are no easy fixes to our predicament. Unsustainable trends in the economy, energy, and the environment have finally caught up with us and are converging on a very narrow window of time—the "Twenty-Teens." *The Crash Course* presents our predicament and illuminates the path ahead, so you can face the coming disruptions and thrive—without fearing the future or retreating into denial. In this book you will find solid facts and grounded reasoning presented in a calm, positive, non-partisan manner. Our money system places impossible demands upon a finite world. Exponentially rising levels of debt, based on assumptions of future economic growth to fund repayment, will shudder to a halt and then reverse. Unfortunately, our financial system does not operate in reverse. The consequences of massive deleveraging will be severe. Oil is essential for economic growth. The reality of dwindling oil supplies is now internationally recognized, yet virtually no developed nations have a Plan B. The economic risks to individuals, companies, and countries are varied and enormous. Best-case, living standards will drop steadily worldwide. Worst-case, systemic financial crises will toss the world into jarring chaos. This book is written for those who are motivated to learn about the root causes of our predicaments, protect themselves and their families, mitigate risks as much as possible, and control what effects they can. With challenge comes opportunity, and *The Crash Course* offers a positive vision for how to reshape our lives to be more balanced, resilient, and sustainable.

For more than four-hundred years, *Introduction to the Devout Life* by Doctor of the Church St. Francis de Sales has been regarded as the essential guide to holiness and loving God. This spiritual classic takes on new life in *Lift Up Your Heart*, where Rev. John Burns has interpreted ten meditations for the modern reader and distilled them into a ten-day mini-retreat that can easily be completed in the midst of a busy life. This practical book goes right to the heart of helping you kick the habit of floating along on your spiritual journey to start actively pursuing holiness and devotion to God. During the course of the retreat, you'll learn the basics of forming a daily prayer routine, including how to offer yourself to God, meditate on his love, and maintain peace in the face of suffering and clarity in the midst of temptation. The meditations will help you: Adopt gratitude as a daily prayer practice. Examine and reorder your priorities and relationships to better reflect your love for God. Discern between good and evil in your life. Desire to love and serve as Jesus did. In a very real sense, Burns helps you take St. Francis de Sales as your spiritual director for ten days. As you do so, you'll feel God's fatherly love and restart your faith life, equipped with the tools to connect with God and live for heaven now.

We tend to view prolonged economic downturns, such as the Great Depression of the 1930s and the Long Depression of the late nineteenth century, in terms of the crisis and pain they cause. But history teaches us that these great crises also represent opportunities to remake our economy and society and to generate whole new eras of economic growth and prosperity. In terms of innovation, invention, and energetic risk taking, these periods of "creative destruction" have been some of the most fertile in history, and the changes they put into motion can set the stage for full-scale recovery. In *The Great Reset*, bestselling author and economic development expert Richard Florida provides an engaging and sweeping examination of these previous economic epochs, or "resets." He distills the deep forces that have altered physical and social landscapes and eventually reshaped economies and societies. Looking toward the future, Florida identifies the patterns that will drive the next Great Reset and transform virtually every aspect of our lives — from how and where we live, to how we work, to how we invest in individuals and infrastructure, to how we shape our cities and regions. Florida shows how these forces, when

combined, will spur a fresh era of growth and prosperity, define a new geography of progress, and create surprising opportunities for all of us. Among these forces will be \* new patterns of consumption, and new attitudes toward ownership that are less centered on houses and cars \* the transformation of millions of service jobs into middle class careers that engage workers as a source of innovation \* new forms of infrastructure that speed the movement of people, goods, and ideas \* a radically altered and much denser economic landscape organized around "megaregions" that will drive the development of new industries, new jobs, and a whole new way of life We've weathered tough times before. They are a necessary part of economic cycles, giving us a chance to clearly see what's working and what's not. Societies can be reborn in such crises, emerging fresh, strong, and refocused. Now is our opportunity to anticipate what that brighter future will look like and to take the steps that will get us there faster. With his trademark blend of wit, irreverence, and rigorous research and analysis, Florida presents an optimistic and counterintuitive vision of our future, calling into question long-held beliefs about the nature of economic progress and forcing us to reassess our very way of life. He argues convincingly that it's time to turn our efforts — as individuals, as governments, and as a society — to putting the necessary pieces in place for a vibrant, prosperous future.
