Dirty gas tanks, lines, or fuel filter can re introduce dirt into the carburetor causing the needle to not seal. Gently hold the float up to close the needle and suck on the fuel inlet hole. It should not allow air to pass through. Last but not least check the float level. Also does the carburetor have an idle solenoid.

Holley 1940 Carburetor Flooding, or Too Rich Trouble Shooting: Flooding, or running too rich is technically two different things, but in both cases too much fuel is getting dumped into the engine. When gas is coming out of the top of the carburetor, or from the throttle shaft end, then that is flooding.

Float has a retainer and when the top is on the carburetor the retainer is pressed down and that holds the float in place. Gas Boils Out After Turning Engine Off. This is called percolation. The float bowl top vent is used to relieve the fuel vapors from the float bowl, otherwise the vapors enter the carburetor bore causing a rich condition.

~~Carter BBD 2 Barrel Troubleshooting — Mikes Carburetor Parts~~

Observe the pump jet in the carburetor, and with your hand, work the carburetor throttle to the wide-open position. You should observe a healthy squirt of fuel from the pump jet. A single barrel carburetor will normally squirt a single stream; while a two or four barrel carburetor will normally squirt 2 streams.

~~New Carburetors Carter, Holley, Rochester~~

Carburetor problems generally fall into three areas: too lean a mixture, too rich a mixture, or an incorrect adjustment. Luckily there are telltale symptoms that will tell you which problem you're dealing with. Carburetors are relatively simple devices. Their primary function is to deliver the right amount of fuel/air mixture at a given ...
