Connectography: Mapping the Future of Global Civilization. From the visionary bestselling author of The Second World and How to Run the World comes a bracing and authoritative guide to a future shaped less by national borders than by global supply chains, a world in which the most connected powers--and people--will win.

Connectography: Mapping the Future of Global Civilization ...
Parag Khanna’ s Connectography follows the rise of global supply chains and argues economic links between cities are supplanting national and subnational borders as the most relevant way to organize the global economy. He traces supply chains’ impact on development, culture, and ideas.

Connectography: Mapping the Future of Global Civilization ...
Parag, the author of The Second World and How to Run the World, is a visionary, and visual, thinker who offers a hopeful, yet realistic, (literal) map of the world's future. His new book, Connectography , does that in spades and hits bookshelves today, and Mr. Khanna was kind enough to share the prologue with us.

Connectography: Mapping the Future of Global Civilization
In Connectography, Parag Khanna surveys the economic, political and technological landscape and lays out the case for why "competitive connectivity" - with cities and supply chains as the vital nodes - is the true arms race of the twenty-first century. This bold reframing is an exciting addition to our ongoing debate about geopolitics and the future of globalization' -- Dominic Barton, Global Managing Partner, McKinsey & Company

Connectography: Mapping the Global Network Revolution ...
(PDF) Parag Khanna,Connectography: Mapping the Future of Global Civilization (2016)

Connectivity, not geography, is our destiny. Mankind is reengineering the planet, investing up to ten trillion dollars per year in transportation, energy, and communications infrastructure linking the worlds burgeoning megacities together. Khanna explores the profound consequences this will have for geopolitics, economics, demographics, the environment, and social identity.

From the visionary bestselling author of The Second World and How to Run the World comes a bracing and authoritative guide to a future shaped less by national borders than by global supply chains, a world in which the most connected powers—and people—will win. Connectivity is the most revolutionary force of the twenty-first century. Mankind is reengineering the planet, investing up to ten trillion dollars per year in transportation, energy, and communications infrastructure linking the world’ s burgeoning megacities together. This has profound consequences for geopolitics, economics, demographics, the environment, and social identity. Connectivity, not geography, is our destiny. In Connectography, visionary strategist Parag Khanna travels from Ukraine to Iran, Mongolia to North Korea, Pakistan to Nigeria, and across the Arctic Circle and the South China Sea to explain the rapid and unprecedented changes affecting every part of the planet. He shows how militaries are deployed to protect supply chains as much as borders, and how nations are less at war over territory than engaged in tugs-of-war over pipelines, railways, shipping lanes, and Internet cables. The new arms race is to connect to the most markets—a race China is now winning, having launched a wave of infrastructure investments to unite Eurasia around its new Silk Roads. The United States can only regain ground by fusing with its neighbors into a super-continental North American Union of shared resources and prosperity. Connectography offers a unique and hopeful vision for the future. Khanna argues that new energy discoveries and technologies have eliminated the need for resource wars; ambitious transport corridors and power grids are unscrambling Africa’ s fraught colonial borders; even the Arab world is evolving a more peaceful map as it builds resource and trade routes across its war-torn landscape. At the same time, thriving hubs such as Singapore and Dubai are injecting dynamism into young and heavily populated regions, cyber-communities empower commerce across vast distances, and the world’ s ballooning financial assets are being wisely invested into building an inclusive global society. Beneath the chaos of a world that appears to be falling apart is a new foundation of connectivity pulling it together. Praise for Connectography " Incredible . . . With the world rapidly changing and urbanizing, [Khanna’ s] proposals might be the best way to confront a radically different future. " —The Washington Post " Clear and coherent . . . a well-researched account of how companies are weaving ever more complicated supply chains that pull the world together even as they squeeze out inefficiencies. . . [He] has succeeded in demonstrating that the forces of globalization are winning. " —Adrian Woolridge, The Wall Street Journal " Bold . . . With an eye for vivid details, Khanna has . . . produced an engaging geopolitical travelogue. " —Foreign Affairs " For those who fear that the world is becoming too inward-looking, Connectography is a refreshing, optimistic vision. " —The Economist " Connectivity has become a basic human right, and gives everyone on the planet the opportunity to provide for their family and contribute to our shared future. Connectography charts the future of this connected world. " —Marc Andreessen, general partner, Andreessen Horowitz " Khanna’ s scholarship and foresight are world-class. A must-read for the next president. " —Chuck Hagel, former U.S. secretary of defense This title has complex layouts that may take longer to download.

Which lines on the map matter most? It's time to reimagine how life is organized on Earth. In Connectography, Parag Khanna guides us through the emerging global network civilization in which mega-cities compete over connectivity and borders are increasingly irrelevant. Travelling across the world, Khanna shows how twenty-first-century conflict is a tug-of-war over pipelines and Internet cables, advanced technologies and market access. Yet Connectography also offers a hopeful vision of the future - beneath the chaos of a world that appears to be falling apart, a new foundation of connectivity is pulling it together.

Here is a stunning and provocative guide to the future of international relations—a system for managing global problems beyond the stalemates of business versus government, East versus West, rich versus poor, democracy versus authoritarianism, free markets versus state capitalism. Written by the most esteemed and innovative adventurer-scholar of his generation, Parag Khanna’ s How to Run the World posits a chaotic modern era that resembles the Middle Ages, with Asian empires, Western militaries, Middle Eastern sheikhdoms, magnetic city-states, wealthy multinational corporations, elite clans, religious zealots, tribal hordes, and potent media seething in an ever more unpredictable and dangerous storm. But just as that initial " dark age" ended with the Renaissance, Khanna believes that our time can become a great and enlightened age as well—only, though, if we harness our technology and connectedness to forge new networks among governments, businesses, and civic interest groups to tackle the crises of today and avert those of tomorrow. With his trademark energy, intellect, and wit, Khanna reveals how a new " mega-diplomacy " consisting of coalitions among motivated technocrats, influential executives, super-philanthropists, cause-mopolitan activists, and everyday churchgoers can assemble the talent, pool the money, and deploy the resources to make the global economy fairer, rebuff failed states, combat terrorism, promote good governance, deliver food, water, health care, and education to those in need, and prevent environmental collapse. With examples taken from the smartest capital cities, most progressive boardrooms, and frontline NGOs, Khanna shows how mega-diplomacy is more than an ad hoc approach to running a world where no one is in charge—it is the playbook for creating a stable and self-correcting world for future generations. How to Run the World is the cutting-edge manifesto for diplomacy in a borderless world.

Grand explanations of how to understand the complex twenty-first-century world have all fallen short – until now. In The Second World, the brilliant young scholar Parag Khanna takes readers on a thrilling global tour, one that shows how America’ s dominant moment has been suddenly replaced by a geopolitical marketplace wherein the European Union and China compete with the United States to shape world order on their own terms. This contest is hottest and most decisive in the Second World: pivotal regions in Eastern Europe, Central Asia, Latin America, the Middle East, and East Asia. Khanna explores the evolution of geopolitics through the recent histories of such underreported, fascinating, and complicated countries as Azerbaijan, Uzbekistan, Colombia, Libya, Vietnam, and Malaysia – nations whose resources will ultimately determine the fate of the three superpowers, but whose futures are perennially uncertain as they struggle to rise into the first world or avoid falling into the third. Informed, witty, and armed with a traveler’ s intuition for blending into diverse cultures, Khanna mixes copious research with deep reportage to remake the map of the world. He depicts second-world societies from the inside out, observing how globalization divides them into winners and losers along political, economic, and cultural lines – and shows how China, Europe, and America use their unique imperial gravities to pull the second-world countries into their orbits. Along the way, Khanna also explains how Arabism and Islamism compete for the Arab soul, reveals how Iran and Saudi Arabia play the superpowers against one another, unmask Singapore’ s inspirational role in East Asia, and psychoanalyzes the second-world leaders whose decisions are reshaping the balance of power. He captures the most elusive formula in international affairs: how to think like a country. In the twenty-first century, globalization is the main battlefield of geopolitics, and America itself runs the risk of descending into the second world if it does not renew itself and redefine its role in the world. Comparable in scope and boldness to Francis Fukuyama’ s The End of History and the Last Man and Samuel P. Huntington’ s The Clash of Civilizations and the Remaking of World Order, Parag Khanna’ s The Second World will be the definitive guide to world politics for years to come. " A savvy, streetwise primer on dozens of individual countries that adds up to a coherent theory of global politics. " —Robert D. Kaplan, author of Eastward to Tartary and Warrior Politics " A panoramic overview that boldly addresses the dilemmas of the world that our next president will confront. " —Dr. Zbigniew Brzezinski, former national security advisor "Parag Khanna's fascinating book takes us on an epic journey around the multipolar world, elegantly combining historical analysis, political theory, and eye-witness reports to shed light on the battle for primacy between the world's new empires." — Mark Leonard, Executive Director, European Council on Foreign Relations "Khanna, a widely recognized expert on global politics, offers an study of the 21st century's emerging "geopolitical marketplace" dominated by three "first world" superpowers, the U.S., Europe and China... The final pages of his book warn eloquently of the risks of imperial overstretch combined with declining economic dominance and deteriorating quality of life. By themselves those pages are worth the price of a book that from beginning to end inspires reflection." — Publishers Weekly

With insight, clarity, warmth and enthusiasm, Hazel Henderson announces the mature presence of the green economy. Mainstream media and big business interests have sidelined its emergence and evolution, but it is now a significant and rapidly growing sector. Throughout Ethical Markets Henderson weaves statistics and analysis with profiles of entrepreneurs, environmentalists, scientists, and professionals. Based on interviews conducted on her longstanding US public television series, these profiles celebrate those who have led the highly successful growth of green businesses around the world. Ethical Markets is the ultimate sourcebook on today’ s thriving green economy.

American democracy just isn't good enough anymore. A costly election has done more to divide American society than unite it, while trust in government—and democracy itself—is plummeting. But there are better systems out there, and America would be wise to learn from them. In this provocative manifesto, globalization scholar Parag Khanna tours cutting-edge nations from Switzerland to Singapore to reveal the inner workings that allow them that lead the way in managing the volatility of a fast-changing world while delivering superior welfare and prosperity for their citizens. The ideal form of government for the complex 21st century is what Khanna calls a "direct technocracy," one led by experts but perpetually consulting the people through a combination of democracy and data. From a seven-member presidency and a restructured cabinet to replacing the Senate with an Assembly of Governors, Technocracy in America is full of sensible proposals that have been proven to work in the world's most successful societies. Americans have a choice for whom they elect president, but they should not wait any longer to redesign their political system following Khanna's pragmatic vision.

Geofusion is an exciting journey around the main issues of the 21st century.This is a book with roadmaps that show the complexity of our world, the interconnections between places, people, schools of thoughts, and disciplines. Starting with a geographical frame of reference, readers are taken through the global geo-economic trends and likely future scenarios as well as the driving forors of the new world economy. The book points to the importance of cities as the power centers for the multidimensional global network of the 21st century. Geofusion is a thought-provoking guidebook to our interconnected world.

This comprehensive and informed text offers a practical introduction to the workings of the global economy. Drawing on his hands-on experience in international finance and economic policy, Andrew Vonnegut clearly explains economic concepts and illustrates them with cogent case studies. He describes the global economy by combining principles of economics with investment finance, decision theory, economic history, behavioral psychology, and accounting. Within a rigorous framework that sheds light on the reasons behind international economic events and trends, he brings the people, institutions, incentives, and money flows of the global economy to life. Oriented toward professionals and students, working or intending to work in the global economy, this book fills an important void. It will be invaluable for practitioners in business, investment finance, public policy, consulting, global studies, and journalism. Providing the tools needed to understand international economics, Vonnegut enlightens readers on the people, behaviors, and institutions behind trade and investment flows in today’ s globalized economies, and how they all contribute to the volatile and dynamic world we are experiencing.

Many of us feel uneasy with the lack of recognition that our community, city, region or country receives internationally and with the stereotypes and outdated clich é s by which " outsiders " define us. This has probably been the case for as long as man exists, but in today’ s world with its global connections and social media, it is becoming more apparent, more relevant and more frustrating, to citizens generally, but in particular to policy makers, public administrators, leaders and representatives in public, private and civil society sectors. Why this is so and what to do about it is the topic of this book. It is the first book to discuss the issue of community reputation in a manner that is accessible to all: free from any use of jargon, management terminology or unnecessary complexity. It argues that for communities to be admired, they need a sense of belonging and purpose in order to do amazing imaginative things befitting their character while captivating others. Imaginative initiatives are recognisably from somewhere and hence cut through the clutter in order to create community profile. The book contains examples from Austin, Barcelona, Bhutan, Den Bosch, Dubai, Egypt, Eindhoven, Estonia, Finland, Firenze (Florence), Kazakhstan, Lanzarote, Limburg (Maastricht Region), Oslo, Rome, The Hague, the United States of America and other communities. The book primarily aims to inspire readers and offer them a broad overview of an issue in modern society that is of interest and relevance to all of us: the reputation of our communities. ' It has been said that countries should measure their gross national imagination, a critical resource for success in the twenty-first century. This important new book shows why this is crucial in an age of fractured identity – and how so many places have forged initiatives that put themselves on the map but also inspire the rest of the world. ' Dr Parag Khanna, Author of Connectography: Mapping the Future of Global Civilization ' I am a big believer in the power of purpose: that companies and individuals should have a meaningful purpose that guides their thinking, decisions, and actions. But until I read Robert Govers' Imaginative Communities, the thought of applying purpose at the community level never occurred to me. Read this brilliant book and you, too, will see how to bring a sense of belonging and meaningful purpose to your communities, no matter their size. ' B. Joseph Pine II, Co-author, The Experience Economy ' Robert Govers has written a terrific book. With miraculous clarity he guides the reader on a world tour of the subject of community reputation and its management. He presents a breathtaking range of places and kinds of actors – cities, regions and nation states – from the Americas to Central Asia and on to the Pacific. His examples are new, thought provoking and illuminated by his personal experience as a researcher and consultant. Best of all, his conclusion underlines the need for citizens to focus not on presenting a better image but on building for a better reality. ' Nicholas J. Cull, Author of Public Diplomacy: Global Engagement in the Era of Social Media ' A really important addition to our understanding of people, places and their purpose. Govers’ book is a refreshing and highly readable departure from " practitioner " texts that simply apply tired marketing principles to the management and promotion of places. Incisive and genuinely thought provoking, this book deserves a place on the desk of every senior policy-maker national, regional and city governments worldwide. " Simon Anholt, Founder of Good Country
