This book presents 125 critical research questions to advance the field of sports, exercise, and performance psychology, with 5 must-read papers per chapter. With contributions from expert researchers in their respective areas, this book focuses on performance and learning, health and wellbeing, and cultural and professional considerations.

This present volume contains the text of all contributions (oral and posters), except for the four invited papers, which were presented at the 3rd International Symposium on High Pressure Chemical Engineering on October 7-9, 1996. The symposium was divided into three major sections, namely - Chemical reaction engineering - Separation processes and phase equilibria - Plant, apparatus, machinery, measurements, control.
