The General Aptitude and Abilities Series provides functional, intensive test practice and drill in the basic skills and areas common to many civil service, general aptitude or achievement examinations necessary for entrance into schools or occupations. The Mechanical Aptitude Passbook(R) prepares you by sharpening the skills and abilities necessary to succeed in a wide range of mechanical-related occupations. It includes supplementary text on machines and provides hundreds of multiple-choice questions that include, but are not limited to: use and knowledge of tools and machinery; basic geometry and mathematics; mechanical comprehension; and more.

Don't simply show your data—tell a story with it! Storytelling with Data teaches you the fundamentals of data visualization and how to communicate effectively with data. You'll discover the power of storytelling and the way to make data a pivotal point in your story. The lessons in this illuminative text are grounded in theory, but made accessible through numerous real-world examples—ready for immediate application to your next graph or presentation. Storytelling is not an inherent skill, especially when it comes to data visualization, and the tools at our disposal don't make it any easier. This book demonstrates how to go beyond conventional tools to reach the root of your data, and how to use your data to create an engaging, informative, compelling story. Specifically, you'll learn how to: Understand the importance of context and audience Determine the appropriate type of graph for your situation Recognize and eliminate the clutter clouding your information Direct your audience's attention to the most important parts of your data Think like a designer and utilize concepts of design in data visualization Leverage the power of storytelling to help your message resonate with your audience Together, the lessons in this book will help you turn your data into high impact visual stories that stick with your audience. Rid your world of ineffective graphs, one exploding 3D pie chart at a time. There is a story in your data—Storytelling with Data will give you the skills and power to tell it!

Intellectual property transactions underlie large segments of the global economy, from pharmaceuticals to computing, entertainment to digital content. This first-of-its-kind resource combines practical contract drafting and negotiation skills with substantive legal doctrine in the rapidly growing area of intellectual property transactions and licensing. Though primarily designed for classroom use, it is also a must-have legal reference work for every lawyer involved in the technology, biopharma, entertainment, media or financial services industries. It includes practical drafting models and explanations of key contractual provisions such as field of use, exclusivity, milestones, royalties, termination, indemnification and liability, and combines these with discussion of the latest cases interpreting these provisions. Numerous legal doctrines that affect the enforcement of IP agreements are also covered, including exhaustion, first sale, misuse, estoppel, antitrust and bankruptcy law, as well as chapters focusing on specialized fields such as trademark law, music licensing, technical standardization, and IP pooling. This book is also available as Open Access on Cambridge Core.

Gradually replacing 2nd ed., published 1982-

Scientists and engineers consider how the lower starting temperature of new engine designs will impact the flow of oil through them, and how new oil can be developed to address the changes. Seven of the 11 papers, presented to a June 1999 symposium in St. Louis, Missouri, report on a study by a comm
