Survey of Historic Costume presents a thorough overview and chronology of Western dress from the ancient world to the trends of today.

This text provides the foundation for a wide range of careers in the fashion business. Incorporating the experience of the author and her five earlier editions of *Fashion Merchandising: An Introduction*, this book covers product development, home fashions, retailing strategies, and examines how communication trends and technological advances impact the fashion world.

The new edition of what is now considered a classic on online learning has been expanded by about a third to reflect new opportunities offered by social media, new insights and ideas derived from the author's teaching in the eight years since she wrote the first edition, as well as from extensive research in the latest literature. In particular, Tisha Bender investigates whether the existing paradigm of teaching and learning has been changed, not so much because of the advent of the Internet, but because of the potential divide between the expectations and practices of students who are "digital natives" of the digital revolution, and those of their teachers who are mostly "digital immigrants". She addresses the question: do we need to change the way we teach in order to reach and engage digital natives fruitfully and enjoyably in their education. This accessible and comprehensive book offers an engaging and practical approach to online teaching that is rooted in the author's experience and enthusiasm for creating a virtual environment that engages students and fosters their deep learning. This is a book for all educators and administrators in higher education, in any discipline, engaged in, or contemplating offering, online classes that involve discussion or collaborative learning. It is relevant both to faculty teaching a hybrid and face-to-face classes, and courses conducted entirely online.

Unlike their colleagues in music theory and music education, teachers of music history have tended not to commit their pedagogical ideas to print. This collection of essays seeks to help redress the balance, providing advice and guidance to those who teach a college-level music history or music appreciation course, be they a graduate student setting out on their teaching career, or a seasoned professor having to teach outside his or her speciality. Divided into four sections, the book covers the basic music history survey usually taken by music majors; music appreciation and introductory courses aimed at non-majors; special topic courses such as women and music, music for film and American music; and more general issues such as writing, using anthologies, and approaches to teaching in various situations. In addition to these specific areas, broader themes emerge across the essays. These include how to integrate social history and cultural context into music history teaching; the shift away from the 'classical canon'; and how to organize a course taking into consideration time constraints and the need to appeal to students from a diverse range of backgrounds. With contributions from both teachers approaching retirement and those at the start of their careers, this volume provides a spectrum of experience which will prove valuable to all teachers of music history.

What does it mean to grow up today as working-class young adults? How does the economic and social instability left in the wake of neoliberalism shape their identities, their understandings of the American Dream, and their futures? *Coming Up Short* illuminates the transition to adulthood for working-class men and women. Moving away from easy labels such as the "Peter Pan generation," Jennifer Silva reveals the far bleaker picture of how the erosion of traditional markers of adulthood—marriage, a steady job, a house of one's own—has changed what it means to grow up as part of the post-industrial working class. Based on one hundred interviews with working-class people in two towns—Lowell, Massachusetts, and Richmond, Virginia—Silva sheds light on their experience of heightened economic insecurity, deepening inequality, and uncertainty about marriage and family. Silva argues that, for these men and women, coming of age means coming to terms with the absence of choice. As possibilities and hope contract, moving into adulthood has been re-defined as a process of personal struggle—an adult is no longer someone with a small home and a reliable car, but someone who has faced and overcome personal demons to reconstruct a transformed self. Indeed, rather than turn to politics to restore the traditional working class, this generation builds meaning and dignity through the struggle to exorcise the demons of familial abuse, mental health problems, addiction, or betrayal in past relationships. This dramatic and largely unnoticed shift reduces becoming an adult to solitary suffering, self-blame, and an endless seeking for signs of progress. This powerfully written book focuses on those who are most vulnerable—young, working-class people, including African-Americans, women, and single parents—and reveals what, in very real terms, the demise of the social safety net means to their fragile hold on the American Dream.

You've heard about "flipping your classroom"—now find out how to do it! Introducing a new way to think about higher education, learning, and technology that prioritizes the benefits of the human dimension. José Bowen recognizes that technology is profoundly changing education and that if students are going to continue to pay enormous sums for campus classes, colleges will need to provide more than what can be found online and maximize "naked" face-to-face contact with faculty. Here, he illustrates how technology is most powerfully used outside the classroom, and, when used effectively, how it can ensure that students arrive to class more prepared for meaningful interaction with faculty. Bowen offers practical advice for faculty and administrators on how to engage students with new technology while restructuring classes into more active learning environments.
