They must possess the knowledge required to identify the presence of hazardous materials and WMD, and have an understanding of what their role is within the response plan. The second edition of Hazardous Materials Awareness and Operations will provide fire fighters and first responders with these skills and enable them to keep themselves and others safe while mitigating these potentially deadly incidents. Hazardous Materials Awareness and Operations, Second Edition meets and exceeds the requirements for first responders within the 2013 Edition of NFPA 472, Standard for Competence of Responders to Hazardous Materials/Weapons of Mass Destruction Incidents. Additionally, the material presented also exceeds the hazardous materials response requirements of the Occupational Safety and Health Administration (OSHA) and the Environmental Protection Agency (EPA). Hazardous Materials Awareness and Operations provides in-depth coverage of: • The properties and effects of hazardous materials and WMDs • How to calculate potential danger and initiate a response plan • Selection, use, advantages, and disadvantages of personal protective equipment • Mass and technical decontamination • Evidence preservation and sampling • Product control • Victim rescue and recovery • Air monitoring and sampling • Illicit laboratory incidents The second edition features: • A new chapter on Fire Smoke designed to teach hazardous materials responders how to prevent, protect, detect, diagnose, and appropriately treat smoke inhalation. • Knowledge and Skills Objectives correlated to the 2013 Edition of NFPA 472, Standard for Competence of Responders to Hazardous Materials/Weapons of Mass Destruction Incidents. • Detailed step-by-step skill drills with which include the corresponding NFPA job performance requirement. • Scenario based learning tools including You are the Responder, Responder in Action, and Voices of Experience case studies to encourage critical thinking skills. • Responder Tips and Safety Tips to provide helpful advice from hazardous materials veterans.

Does the identification number 60 indicate a toxic substance or a flammable solid, in the molten state at an elevated temperature? Does the identification number 1035 indicate ethane or butane? What is the difference between natural gas transmission pipelines and natural gas distribution pipelines? If you came upon an overturned truck on the highway that was leaking, would you be able to identify if it was hazardous and know what steps to take? Questions like these and more are answered in the Emergency Response Guidebook. Learn how to identify symbols for and vehicles carrying toxic, flammable, explosive, radioactive, or otherwise harmful substances and how to respond once an incident involving those substances has been identified. Always be prepared in situations that are unfamiliar and dangerous and know how to rectify them. Keeping this guide around at all times will ensure that, if you were to come upon a transportation situation involving hazardous substances or dangerous goods, you will be able to help keep others and yourself out of danger. With color-coded pages for quick and easy reference, this is the official manual used by first responders in the United States and Canada for transportation incidents involving dangerous goods or hazardous materials.

Are you in the Hazardous Waste industry or considering entering into this line of work? If so, there are many things that you need to know. The most important thing to consider in this line of work is your own personal safety and the safety of your team. Second, you must know and understand the requirements that OSHA, U.S.D.O.T., EPA, and other local, state, and federal agencies expect you to strictly follow. There is a lot of new information in this 2nd edition that will especially help personnel out in the field. Some of these new additions are: Detailed Decontamination Procedures, OSHA Confined Space Entry Regulations, and a Chemical Compatibility Chart, just to name a few.The HAZWOPER Handbook - 2nd edition can be used as a training aid for new hazardous waste workers or for those who need to update their annual refresher training. The HAZWOPER Handbook was designed for those workers who may need to reference a particular area within industry standards and practices and covers many topics such as: Environmental regulations, safety program management, energy hazards, most common job hazards, fire behavior, responding to meth labs, responding to terrorist incidents, and more! This handbook provides you with the necessary information to work safely in the field and to operate as an OSHA compliant hazardous waste worker.Author: Brett Postelli has 29 years of experience in public safety and private sector emergency response operations. Mr. Postelli began his career in public service in 1989 as a firefighter and medical first responder. While attending college, Mr. Postelli studied fire science and law enforcement. In 1994 Mr. Postelli graduated from the Kalamazoo Valley Regional Police Academy in Kalamazoo, Michigan and served as a State of Michigan certified firefighter, medical first responder and sworn police officer. After ten years of service, Mr. Postelli left the public sector and pursued work as a government contractor responding to environmental emergencies and natural disasters, provided support work and technical rescue for nuclear facilities throughout the U.S., served as an armed federal security contractor and communications technician in the Washington, D.C. area. Mr. Postelli is a published author, (Hazwoper Handbook - 8-40 Hr. Field technicians and emergency response personnel are often faced with the dangers of flammable, combustible, and chemically unstable materials. Although there are numerous procedures set forth by regulatory agencies like the Occupational Safety and Health Administration (OSHA), the Environmental Protection Agency (EPA), and the National Institute for Occupational Safety and Health (NIOSH) for effectively and safely dealing with such environmental hazards, up until now there has been no single resource for training in this area. Based on the author's twenty-plus years of field experience, Hazardous Waste Operations and Emergency Response Manual is a comprehensive text that covers the complete curriculum requirements set forth by OSHA and HazWOPER. Highly accessible and broad in focus, the book is equally useful as a technical resource for training, a hands-on reference for field operations, and a textbook for environmental courses in a variety of areas. Coverage includes:Methods recommended by professional societies and regulatory agencies including the National Fire Protection Association, OSHA, EPA, and NIOSHPractical examples and assignments in each chapter to supplement the text and enhance usefulness to students.

A Complete Training Solution for Hazardous Materials Technicians and Incident Commanders! In 1982, the authors Mike Hildebrand and Greg Noll, along with Jimmy Yvorra, first introduced the concept of the Eight-Step Process® for managing hazardous materials incidents when their highly regarded manual, Hazardous Materials: Managing the Incident was published. Now in its Fourth Edition, this text is widely used by fire fighters, hazmat teams, bomb squads, industrial emergency response teams, and other emergency responders who may manage unplanned hazardous materials incidents. As a result of changing government regulations and consensus standards, as well as the need for terrorism response training, Mr. Noll and Mr. Hildebrand have modified and refined their process of managing hazmat incidents and added enhanced content, tips, case studies, and detailed charts and tables. The Fourth Edition contains comprehensive content covering: • Hazard assessment and risk evaluation • Identifying the problem and implementing the response plan • Hazardous materials properties and effects • Identifying and coordinating resources • Decontamination procedures • The Eight-Step Process® • Personal protective equipment selection • Procedures for terminating the incident The Fourth Edition 's dynamic features include: • Knowledge and Skills Objectives correlated to the 2013 Edition of NFPA 472, Standard for Competence of Responders to Hazardous Materials/Weapons of Mass Destruction Incidents • ProBoard Assessment Methodology Matrices for the Hazardous Materials Technician and Hazardous Materials Incident Commander levels • Correlation matrix to the National Fire Academy 's Fire and Emergency Services Higher Education (FESHE) Bachelor 's (Non- Core) Managerial Issues in Hazardous Materials Course Objectives • Realistic, detailed case studies • Practical, step-by-step skill drills • Important hazardous materials technician and safety tips

NOTE: NO FURTHER DISCOUNT FOR THIS PRINT PRODUCT-- OVERSTOCK SALE -- Significantly reduced list price In the U.S., the response to an incident is regulated under many statues and many government agencies. It is important for responders to at least understand the basis of these regulations because they dictate everything, from how they manage a spill to the disposal of the spilt material. These regulations stipulate who should be notified and when it is not necessary, as well as what resources or assistance are available to local and state entities if the containment of a spill is beyond their capabilities.
