Responding to the growth of digital products and the commercial imperative to build new digital businesses, The Business of Digital Publishing offers a comprehensive introduction to the development of digital products in the book and journal industries. This textbook provides background to the main technological development that have influenced the growth of digital publishing, introducing students to the key terms and concepts that make digital publishing possible. Exploring four key publishing sectors: professional reference, academic, education and consumer, this book explains the context for the digital developments in each area and looks at the growth of new business models and the future challenges faced by each sector. It also addresses the key issues that face the industry as a whole, outlining current debates, such as pricing and copyright, and exploring their impact on the industry through relevant case studies. The Business of Digital Publishing is an invaluable resource for any publishing student looking for a starting point from which to explore the world of digital publishing.

Business Analytics (BA) is about turning data into decisions. This book covers the full range of BA topics, including statistics, machine learning and optimization, in a way that makes them accessible to a broader audience. Decision makers will gain enough insight into the subject to have meaningful discussions with machine learning specialists, and those starting out as data scientists will benefit from an overview of the field and take their first steps as business analytics specialist. Through this book and the various exercises included, you will be equipped with an understanding of BA, while learning R, a popular tool for statistics and machine learning.
