Newly revised and expanded, *The Law of Armed Conflict*, 2nd edition introduces law students and undergraduates to the law of war in an age of terrorism. What law of armed conflict (LOAC), or its civilian counterpart, international humanitarian law (IHL), applies in a particular armed conflict? Are terrorists legally bound by that law? What constitutes a war crime? What (or who) is a lawful target and how are targeting decisions made? What are 'rules of engagement' and who formulates them? How can an autonomous weapon system be bound by the law of armed conflict? Why were the Guantánamo military commissions a failure? This book takes students through these LOAC/IHL questions and more, employing real-world examples and legal opinions from the US and abroad. From Nuremberg to 9/11, from courts-martial to the US Supreme Court, from the nineteenth century to the twenty-first, the law of war is explained, interpreted, and applied.

This book offers the most authoritative commentary and analysis of international humanitarian law applicable in armed conflict available. It is based upon the Joint Service Regulation for the German Ministry of Defence, augmented with extensive international references, and accompanied by commentary by a team of distinguished and internationally renowned experts. Whilst the past decades have seen consistent development of international law applicable in armed conflict, culminating in a series of International Covenants and Protocols, world events in recent years have made reassessment of the law both a timely and topical concern. This Handbook available for the first time in paperback will serve as an indispensable reference source for practising lawyers and academics working in the field of international humanitarian law and for military personnel worldwide.

This book provides a modern and basic introduction to a branch of international law constantly gaining in importance in international life, namely international humanitarian law (the law of armed conflict). It is constructed in a way suitable for self-study. The subject-matters are discussed in self-contained chapters, allowing each to be studied independently of the others. Among the subject-matters discussed are, inter alia: the Relationship between jus ad bellum / jus in bello; Historical Evolution of IHL; Basic Principles and Sources of IHL; Martens Clause; International and Non-International Armed Conflicts; Material, Spatial, Personal and Temporal Scope of Application of IHL; Special Agreements under IHL; Role of the ICRC; Targeting; Objects Specifically Protected against Attack; Prohibited Weapons; Perfidy; Reprisals; Assistance of the Wounded and Sick; Definition of Combatants; Protection of Prisoners of War; Protection of Civilians; Occupied Territories; Protective Emblems; Sea Warfare; Neutrality; Implementation of IHL.

Non-international armed conflicts now far outnumber international ones, but the protection afforded by international law to combatants and civilians is not always clear. This book will set out the legal rules and state practice applicable to internal armed conflicts, drawing on armed conflicts from the US civil war to present day.

This Handbook provides a black letter text of international humanitarian law, along with case analysis and commentary by a team of internationally renowned experts. It also highlights the interplay of international humanitarian law with human rights law, and other branches of international law.

This is the third edition of this influential and comprehensive handbook. Substantive changes in international humanitarian law have taken place recently, including a progressive development of customary law; and the jurisprudence of national courts, international ad hoc tribunals and the International Criminal Court, which have made a reassessment of this vitally important part of international law both timely and topical. New material is extensively incorporated, including new developments in treaty law, such as the 2010 amendments to the ICC Statute, as well as new topics that have been extensively debated in recent years: direct participation in hostilities; air and missile warfare; belligerent occupation; operational detention; and the protection of the environment in armed conflict. The growing need to consider borderline issues of the law of armed conflict and the interplay of international humanitarian law, human rights, and other branches of international law have led to have led to some material being considered in a new light. The commentary both deepens reflection on such innovations, and critically reconsiders views expressed in earlier editions to provide a contemporary analysis of this changing field. Renowned international lawyers offer a broad spectrum of legal opinions, restating the law in this area, which is applicable worldwide. Issues of human rights in armed conflicts and in post-conflict situations are extensively addressed. Controversial opinions and national and international judgments are documented and discussed. Problems of application of the law in recent military campaigns are assessed and interpreted in a practice-oriented manner. Based on best-practice rules of global importance, this book also sets out an international 'manual' for international humanitarian law in armed conflicts.

Written by a team of distinguished and internationally renowned experts, this Oxford Handbook gives an analytical overview of international law as it applies in armed conflicts. The Handbook draws on international humanitarian law, human rights law, and the law of neutrality to provide a comprehensive picture of the status of law in war.
