• Prepares students to conduct their first empirical research study, with quantitative and qualitative methods covered in detail. Common features as well as differences between the two research approaches are explored. • While theoretical material is included, the emphasis is on providing practical, easy-to-follow advice on how to conduct a first research project. • Unlike most texts with hypothetical examples, this text—with real examples written by a variety of published researchers—makes research methods come alive. Students see how research methods are used to explore important, contemporary problems. • Factual Questions at the end of each chapter help students review key concepts covered in the chapters. • Questions for Discussion encourage students to consider specific techniques and strategies that they might use while conducting their research.

The only book currently available that comprehensively integrates research and evaluation for evidence-based library and information science practice.

This is an invaluable, concise, all-in-one guide for carrying out student research and writing a paper, adaptable to course use and suitable for use by students independently, it successfully guides students along every step of the way. Allows students to better manage their research projects Exercises and worksheets break down the research process into small steps and walk students through each stage of the research project Offers real-world and lively examples that are attractive and relevant to students Based on twenty years of experience in teaching research techniques to students in a way that avoids the methodology “ overkill ” from encyclopaedic and intimidating textbooks Accompanying website includes powerpoint lecture slides for instructors and helpful links to video resources for student. Visit www.wiley.com/go/wang/researchreportwriting

- The detailed step-by-step directions make it ideal for use by students who are conducting their first research project.
- The large number of examples throughout the text makes the steps in conducting a survey clear and easy to follow.
- Covers only methods that are realistic for use by students who are conducting a survey within a single semester.
- For data analysis, the emphasis is on the use of basic statistics, with the computation of a small number of descriptive statistics illustrated. Easy-to-calculate margins of error are also illustrated.
- The firsthand experience of conducting a survey as a term project helps students understand both the contributions and limitations of survey research methods.
- Successfully conducting a term-project survey can give students the confidence to work on more elaborate studies in the future, such as research for a master ' s degree project.

This text provides comprehensive advice on how to build a successful grant proposal, from the top down and from the bottom up. Editor Robert J. Sternberg gathers editorial expertise from distinguished members of associations in the Federation of Associations of Behavioral and Brain Sciences, which includes some of the most successful grant applicants and grant givers in the field of brain and behavioral sciences. The chapter authors offer readers practical advice on planning, executing, submitting, and revising grant proposals in order to maximize their chances of success. Exploring both grant writers' and grant providers' perspectives, *Writing Successful Grant Proposals from the Top Down and Bottom Up* provides valuable insight into general strategies on how to write and submit proposals, as well as detailed information on the various types of proposals needed to reach particular research and teaching goals.

- Guides students in the preparation of literature reviews for term projects, theses, and dissertations.
- Most chapters are conveniently divided into easy-to-follow guidelines, sequential steps, or checklists. Numerous examples throughout the book show students what should and should not be done when writing reviews.
- Emphasizes critical analysis of reports of empirical research in academic journals—making it ideal as a supplement for research methods courses. This book makes it possible for students to work independently on a critical literature review as a term project.
- Nine model literature reviews at the end of the book provide the stimulus for homework assignments and classroom discussions.
- The activities at the end of each chapter keep students moving toward their goal of writing a polished, professional review of academic literature.
- Most examples include material from recently published research. Includes nine model literature reviews for discussion and evaluation.

An introduction to research methods specifically needed in social work and social welfare, this text outlines the major stages of research projects, covering both quantitative and qualitative methods.

This step-by-step guide takes the reader logically through the process of undertaking a literature review, from determining when this methodology might be useful, through to publishing the findings. It is designed particularly for students undertaking a dissertation using literature review methodology. However, it also caters to practitioners who wish to review the existing evidence in order to develop practice. Key features of the text include: a chapter on what makes a good literature review, so that readers are clear and confident about what they ' re aiming for; discussion of the value of literature reviews, whether for fulfilling the requirements of a course or for developing practice; a chapter structure that reflects the structure of a typical dissertation by literature review, making the material intuitive and easy to navigate; case examples throughout to illustrate how methodological principles work in practice; a troubleshooting guide to provide support and advice on common problems when carrying out a literature review; advice on the dissemination of findings. Written by an established author with significant experience teaching and supervising students doing literature reviews, this invaluable text offers systematic and insightful advice on all aspects of literature review methodology, from problem identification to synthesizing information to forming conclusions. It is ideal for any student or practitioner in health and social care looking to undertake a literature review for study or practice purposes.

The Primer is a practical resource for education and social science beginner researchers who can be tentative about how to begin their research projects and find the detailed research books overwhelming, initially. Central to the Primer is a process, developed by Jackson, to guide beginner researchers in conceptualizing and framing a research project.

The *Writer's Handbook for Sociology* gives students the tools that they need to develop evidence-based writing skills and format academic papers in APA style. This book helps learners develop a reader-friendly writing style incorporating active voice, parallel structure, and conciseness. In addition, grammar and mechanics are presented in a systematic way to facilitate learning, helping students fill learning gaps.
