LYCOMING O-320 B2C Aircraft Piston Engine for sale - 1637999

Induction System - Lycoming O-320 series engines are equipped with a float type carburetor. Particularly good distribution of the fuel-air mixture to each cylinder is obtained through the center zone induction system, which is integral with the oil sump and is submerged in oil, insuring a more uniform vaporization of fuel and aiding in cooling the oil in the sump. From the riser the fuel-air ...

O-320 Series - Lycoming Engines

The Lycoming O-320 is a large family of naturally aspirated, air-cooled, four-cylinder, direct-drive engines produced by Lycoming Engines.They are commonly used on light aircraft such as the Cessna 172 and Piper Cherokee.Different variants are rated for 150 or 160 horsepower (112 or 119 kilowatts). As implied by the engine's name, its cylinders are arranged in horizontally opposed ...

Superior Air Parts :: Parts for Lycoming Engines

The Lycoming O-320 series engines of 150-hp to 160-hp look very much like the four-cylinder Lycomings of lesser power. The increased cubic-inch displacement is the result of increased bore. Stroke is the same as the O-235's and O-290's - 3.875 inches. All modern light plane engines of the opposed cylinder layout are over-square. That is, stroke is markedly less than bore. A short stroke holds ...
