divided into the body.

Meiosis involves the creation of cells that are not genetically identical where, as in mitosis, the cells are the same as the parent cell. The quiz below will test how much you know about the processes.

Flashcards | Quizlet

Mitosis is the method of cell division for somatic cells and involves replication of DNA (replicated chromosomes contain two identical sister chromatids joined by a centromere) followed by one round of division, resulting in 2 diploid daughter cells.

Acces PDF Mitosis And

Meiosis is the method of cell division for germ cells and involves replication of DNA followed by two rounds of division, resulting in 4 haploid gametes.
