Coronaviruses 101: Focus on Molecular Virology#1 [Molecular Biology Question \u0026 Answer | | Important Story of DNA, RNA and protein. introduction to Molecular Genetics lecture 2 by Hadmat Gadhavi](#)
Part-2 | Scientific Fundamentals of DNA Replication process | Molecular biology---By Ankur K Bhogle
Biological Molecules - You Are What You Eat: Crash Course Biology #3
Biomolecules (Updated)Gene Regulation and the Order of the Operon DNA, Hot Pockets, \u0026 The Longest Word Ever: Crash Course Biology #11 ~~Molecular Genetics Activity 2 Answer~~
Working with Molecular Genetics Part Two: ANSWERS per min \times 40 min = $2.4 \times 106\text{bp}$. Dividing the size of the chromosome by this amount synthesized per fork gives $4.64 \times 106\text{bp} / 2.4 \times 106\text{bp}$, or 1.93. Hence two replication forks are sufficient. For bidirectional replication, this requires only one origin, and indeed this is the case.

The work revealed that in regenerating muscle tissue, there was an increased amount of activity from genes responsible for growth. "What really astonished us, however, was the fact that, in both muscle fiber types, we found a huge variety of different types of nuclei, each with different patterns of gene activity," noted Birchmeier.
