When it comes to money management, most of us take a hands-off approach because we're just not confident that we have the know-how needed. But personal finance is actually more personal than it is finance. Tim Maurer has made a career out of distilling complex financial concepts into understandable, doable actions. In this eminently practical book, he shows readers how to - better understand their values and goals in order to simplify their money decisions - budget major expenses intelligently - reduce and eliminate debt - make vital decisions on home, auto, and life insurance - establish a world-class investment portfolio - craft a workable retirement plan - and more Readers will be relieved to see that managing their money is actually not as complicated as they thought--and that they can take control of their financial future starting today.

"The newbie investor will not find a better guide to personal finance." -Burton Malkiel, author of A RANDOM WALK DOWN WALL STREET TV analysts and money managers would have you believe your finances are enormously complicated, and if you don't follow their guidance, you'll end up in the poorhouse. They're wrong. When University of Chicago professor Harold Pollack interviewed Helaine Olen, an award-winning financial journalist and the author of the bestselling Found Foolish, he made an offhand suggestion: everything you need to know about managing your money could fit on an index card. To prove his point, he grabbed a 4" x 6" card, scribbled down a list of rules, and posted a picture of the card online. The post went viral. Now, Pollack teams up with Olen to explain why the ten simple rules of the index card outperform more complicated financial strategies. Inside is an easy-to-follow action plan that works in good times and bad, giving you the tools, knowledge, and confidence to seize control of your financial life.

Awarded the 2016 Nautilus Silver Medal for Personal Growth! This is the book your money-savvy best friend, therapist, and accountant would write if they could. It's the book about money for people who don't even want to think about money, until the arrival of that inevitable day when we all realize we must come to terms with this thing called money. Everyone has pain and challenges, strengths and dreams about money, and many of us mix profound shame into that relationship. In The Art of Money, Bari Tessler offers an integrative approach that creates the real possibility of "money healing," using our relationship with money as a gateway to self-awareness and a training ground for compassion, confidence, and self-worth. Tessler's gentle techniques weave together emotional depth, big picture visioning, and refreshingly accessible, nitty-gritty money practices that will help anyone transform their relationship with money and, in so doing, transform their life. As Bari writes, "When we dare to speak the truth about money, amazing healing begins."

Doing well with money isn't necessarily about what you know. It's about how you behave. And behavior is hard to teach, even to really smart people. Money-investing, personal finance, and business decisions-is typically taught as a math-based field, where data and formulas tell us exactly what to do. But in the real world people don't make financial decisions on a spreadsheet. They make them at the dinner table, or in a meeting room, where personal history, your own unique view of the world, ego, pride, marketing, and odd incentives are scrambled together. In The Psychology of Money, award-winning author Morgan Housel shares 19 short stories exploring the strange ways people think about money and teaches you how to make better sense of one of life's most important topics.
