This book is intended for PHP web developers who have an interest in Laravel and who know the basics of the framework in theory, but don't really know how to use it in practice. No experience of using frameworks is required, but it is assumed you are at least familiar with building dynamic websites in PHP already.

Develop cutting-edge websites and applications using the new features of Laravel 5.8. This book starts with an introduction to Laravel and takes a glance at its newly introduced features. Moving on to setting up your development environment, you will learn how the composer works. In addition to this, you will be introduced to Valet, Homestead, Virtual Box, Vagrant, and Forge in Laravel. With this foundation, you will be ready to get started writing your first Laravel apps. To do so, you will learn to manage routes and controllers and how the Blade template works. Moving on to models, you will work with route model binding and get to know the relationship between models, databases, and Eloquent. Along the way you will define methods on your Eloquent model classes using different types of relationships. Shifting focus to handling user data, you will see how redirect methods work. You will also get to know the inner workings of requests and responses. Continuing the data theme, Beginning Laravel covers basic and grouped artisan commands and how to handle databases with Tinker. By being able to handle data effectively, your applications will come alive for your users, giving them the functionality they need. The last section of the book handles core concepts such as sending emails, alerting users via notifications, and implementing SOLID design principles. You will see how to decouple your application classes by using events and listeners. What You Will Learn Protect your app with authentication and authorization Build a complex relationship between entities using Eloquent models Take advantage of containers and facades Use the mail template Create and configure events Work with Laravel Passport Deploy API authentication Discover new Laravel 5.8 features such as dump server and email verification Who This Book Is For Those new to Laravel and PHP web development or those who have some background in PHP/Laravel who are new to Laravel's newest release.

Dalam dunia teknologi, saat ini dapat dikatakan era mobile platform, di mana pengguna sudah mulai migrasi dari aplikasi berbasis desktop ke mobile seperti web maupun apps. Aplikasi berbasis web tentunya memiliki banyak keunggulan dibandingkan dengan yang berbasis desktop, di antaranya seperti mudah untuk dilakukan pengembangan dan update ketika ada pembaruan kode, akses informasi, dan setup server yang lebih mudah, murah, dan semakin dahsyat. Interface yang digunakan juga tentu akan lebih fleksibel, aman, dan dapat digunakan secara online maupun offline. Aplikasi berbasis web tidak sebatas pada website saja, akan tetapi sudah merasuk ke diagram vital sebuah organisasi dan perusahaan. Banyak perusahaan sekarang ini sudah mulai memakai aplikasi berbasis web, seperti ERP, HRMS, Payroll, CRM, HRIS, HCM, dan program aplikasi lainnya. Salah satu tools/framework untuk membuat aplikasi berbasis web yang terbaik saat ini adalah Laravel. Ada beberapa keunggulan menggunakan Laravel, seperti pengguna dihindari dari pengulangan pekerjaan, keamanan yang terjamin, memudahkan teamwork, interoperability, dan sebagainya. Di dalam buku ini dibahas mengenai: - Pengetahuan dan pemahaman fitur-fitur yang ada pada Linux; - Menjelaskan algoritma dalam permrograman berbasis web; - Instalasi PostgreSQL dan pgadmin desktop di Linux; - Penggunaan fitur pada Laravel.

This proceedings volume provides a multifaceted perspective on current challenges and opportunities that organizations face in their efforts to develop and grow in an ever more complex environment. Featuring selected contributions from the 2019 Griffiths School of Management Annual Conference (GSMAC) on Business, Entrepreneurship and Ethics, this book focuses on the role of creativity, technology and ethics in facilitating the transformation organizations need in order to be ready for the future and succeed. Growth and development have always been imperative for people, organizations, and societies and a relevant topic in the management sciences. Globalization, along with dramatic changes in social, cultural, and technological progress, are the main factors that determine the current conditions for development, putting forth a new set of challenges and opportunities that are putting pressure on organisations to adapt. Although technology and creativity seem to be the mantra for success in this new context, issues around the ethics of these two factors also seem to be crucial to the sustainability of growth in organizations. Featuring contributions on topics such as academic marketing, technology in healthcare organizations, ethical issues in hospitality, artificial intelligence and data mining, this book provides research and tools for students, professors, practitioners and policy makers in the fields of business, management, public administration and sociology.

What sets Laravel apart from other PHP web frameworks? Speed and simplicity, for starters.
