Oualline's "Practical C Programming" is a pretty good book. I like and recommend it. Unfortunately his "Practical C++

~~Practical C++ Programming, 2nd Edition [Book]~~

C is a high-level language. It lets us write a high-level statement like: `area = (base * height) / 2.0;`
`/* Compute area of triangle */.`

The compiler will translate this statement into a series of cryptic

File Type PDF Practical C Programming

low-level machine instructions.
This sort of statement is called an assignment statement.
