most frequently in comedy. It should not be confused with a biceps, which is a point in a meter which can equally be two shorts or a long, as is found in the dactylic hexameter. The biceps is freely able to be two shorts or a long, while resolution, particularly in tragedy, can only occur within very restricted situations.

Updated August 18, 2018 In a work of literature, the resolution is the part of the story's plot where the main problem is resolved or worked out. The resolution occurs after the falling action and is typically where the story ends. Another term for the resolution is "dénouement," which comes from the French term dénoué, meaning "to untie."

For the past 13 years, as the days of December have dwindled and I have prepared for the coming of a new January first, I have found myself turning to one of my favorite occasional poems. Published in the New York Review of Books at the beginning of 2000, Joseph Brodsky's "1-Jan-65" has become, for me, an annual read.

In these poems, the joys and struggles of the everyday are played against the grinding politics of being human. Beginning in a hotel room in the dark of a distant city, we travel through history and follow the memory of the Trail of Tears from the bend in the Tallapoosa River to a place near the Arkansas River. Stomp dance songs, blues, and jazz ballads echo throughout. Lost ancestors are recalled. Resilient songs are born, even as they grieve the loss of their country. Called a "magician and a master" (San Francisco Chronicle), Joy Harjo is at the top of her form in *Conflict Resolution for Holy Beings*.

This book is a formal and functional study of the three distinct meters of Old Norse eddic poetry, *fornyrðislag*, *málhátt*, and *ljóðahátt*. It provides a systematic account of these archaic meters, both synchronic and diachronic, and from a comparative Germanic perspective; particularly concerned with Norse innovations in metrical practice, Suzuki explores how and why the three meters were shaped in West Scandinavia through divergent reorganization of the Common Germanic metrical system. The book constitutes the first comprehensive work on the meters of Old Norse eddic poetry in a single coherent framework; with thorough data presentation, detailed philological analysis, and sophisticated linguistic explanation, the book will be of enormous interest to Old Germanic philologists/linguists, medievalists, as well as metrists of all persuasions. A strong methodological advantage of this work is the extensive use of inferential statistical techniques for giving empirical support to specific analyses and claims being adduced. Another strength is a cognitive dimension, a (re)construction of a prototype-based model of the metrical system and its overall characterization as an integral part of the poetic knowledge that governed eddic poets' verse-making technique in general.

Poetry, Photography, Ekphrasis is a detailed study of the ekphrasis of photography in poetry since the 19th century. Unlike other critical studies of ekphrasis, Miller's study concentrates solely on the lyrical ekphrasis of photographs, setting out to

define how the photographic image provides a unique form of poetic ekphrasis. Moving between the disciplines of semiotics, visual studies, psychology, classical rhetoric, philosophy and literary criticism, Miller outlines what he defines as the chronotope of the photograph. Employing M.M. Bakhtin's notion of the literary chronotope, Miller argues that the ekphrasis of photographs manifests itself in a series of chronotopic narratives. Each chapter of the book is dedicated to delineating one of these narratives. In this work, Miller engages in a literary history that follows the timeline of photography from its origins in the 19th century to its contemporary digital manifestations in the 21st. The study engages in close-readings of the works of such poets as Walt Whitman, Lewis Carroll, Thomas Hardy, Seamus Heaney, Marianne Moore and Philip Larkin. In addition, the book does the work of a comparative study, and it goes beyond the limits of Anglophone literature to include the works of such poets and writers as Walter Benjamin, Charles Baudelaire, Bertolt Brecht, Ernesto Cardenal and Zbigniew Herbert.

The drottkvett was a form of Old Norse skaldic poetry composed to glorify a chieftain's deeds or to lament his death. Kari Ellen Gade explores the structural peculiarities of ninth- and tenth-century drottkvett poetry and suggests a solution to the mystery of the origins of the drottkvett and its eventual demise in the fourteenth century.

Eric Falci's *The Value of Poetry* offers an evaluation and critique of the literary, cultural, and political value of poetry in the twenty-first century. Falci claims that some of the most vital, significant, and enduring human notions have been voiced and held in poems. Poems marble civilizations: they catch courses of thought, tracks of feeling, and acts of speech and embed these shapes in language that is, in some fashion, poised toward the future. Falci argues that poetry is a vital medium in addressing and understanding some of the most pressing issues of our time. Ranging widely across canonical and contemporary poetry, *The Value of Poetry* shows how poems matter, and what poetry offers to readers in the contemporary world.

Discusses the social, cultural, intellectual, and aesthetic aspects of American literature
