"Nurses play a vital role in improving the safety and quality of patient care -- not only in the hospital or ambulatory treatment facility, but also of community-based care and the care performed by family members. Nurses need know what proven techniques and interventions they can use to enhance patient outcomes. To address this need, the Agency for Healthcare Research and Quality (AHRQ), with additional funding from the Robert Wood Johnson Foundation, has prepared this comprehensive, 1,400-page, handbook for nurses on patient safety and quality -- Patient Safety and Quality: An Evidence-Based Handbook for Nurses. (AHRQ Publication No. 08-0043)."--Online AHRQ blurb, <http://www.ahrq.gov/qual/nurses/hbk>.

This book provides the very latest in position statements, and new, forward-thinking in administrative strategies. Addresses fiscal management of outpatient cancer centers, including financial systems models, use of CPT codes, cost effectiveness and clinical applications of evidence-based practice guidelines.

Provides information on documentation issues, including electronic medical records, legal and ethical implications, and documentation in acute cases, along with a variety of charting examples.

This title is directed primarily towards health care professionals outside of the United States. THE NURSING PROCESS; A GLOBAL CONCEPT critically explores a concept that was introduced into nursing in the 1970s and rapidly spread all over the world. It begins with the background and history of the Nursing Process, and analyses its use in various fields, such as managerial technologies and psychiatric nursing. It then goes on to look at its use in six different countries from a variety of world regions - in Europe, Finland, Germany and the Czech Republic, as well as South Africa, Australia and the Caribbean. It explores its strengths and weaknesses, and tries to make some predictions about future use. The book combines descriptions of the state-of-the-art based on extensive literature surveys, as well as analytical approaches. It creates opportunities for comparison, especially with regard to problem-solving strategies. Combines diverse perspectives of the core concept and its use Provides international overviews as well as detailed country reports Based on extensive literature surveys as well as analytical approaches Creates opportunities for comparison especially with regard to problem-solving strategies

Chart Smart: the A-to-Z Guide to Better Nursing Documentation tells nurses exactly what to document in virtually every type of situation they may encounter on the job, no matter where they practice--hospital, medical office, outpatient, rehabilitation facility, long-term care facility, or home. This portable handbook has nearly 300 entries that cover documentation required for common diseases, major emergencies, complex procedures, and difficult situations involving patients, families, other health care team members, and supervisors. In addition to patient care, this book also covers documenta

The Fifth Edition of Nursing Care Plans and Documentation provides nurses with a comprehensive guide to creating care plans and effectively documenting care. This user-friendly resource presents the most likely diagnoses and collaborative problems with step-by-step guidance on nursing action, and rationales for interventions. New chapters cover moral distress in nursing, improving hospitalized patient outcomes, and nursing diagnosis risk for compromised human dignity. The book includes over 70 care plans that translate theory into clinical practice. Online Tutoring powered by Smarthinking--Free online tutoring, powered by Smarthinking, gives students access to expert nursing and allied health science educators whose mission, like yours, is to achieve success. Students can access live tutoring support, critiques of written work, and other valuable tools.

The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of practice -- should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.
