Statistics Test Inference Proportions Part V Answers Statistics I: Inference about a population proportion. For part (a) my professor wants us to perform a two-sided test and use a significance level  $\mathbb{I} = 0.05$ . I'm having issues identifying the values for p-hat (p $\mathbb{I}$ ) and p-naught in the equation for the test statistic, ...

(IV) Statistical Inference Tests of Significance-Proportions and Means Logic of Significance Testing Confidence interval is a form of statistical inference and now we will talk about another form called hypothesis test or test of significance. We use this form of statistical inference when a particular conjecture (hypothesis) has been made about the true value of a population parameter.
