Storage heaters are electric heaters that store thermal energy by heating up internal ceramic bricks during the night and then release heat from them to keep your home warm during the day. Storage heaters are primarily designed for customers who are on a time-of-use electricity tariff, such as Economy 7 and pay a cheaper rate for their energy overnight (usually 12pm-7am).

Offering limited manual control, with no additional features whatsoever, manual storage heaters were a rudimentary heating system that suffered from a lack of usability. Since the Lot 20 Ecodesign Directive came into effect in January 2018, manual storage heaters have been deemed unsatisfactory for the demands of modern electric heating. Taking their place is a new breed of cutting-edge, controllable, and energy-efficient smart storage heaters that include a whole host of new and innovative ...
