The A Series engines are a family of inline-four internal combustion engines with displacement from 1.3 L to 1.8 L produced by Toyota Motor Corporation. The series has cast iron engine blocks and aluminum cylinder heads. To make the engine as short as possible, the cylinders are siamesed. The original 1A engine was only 550 mm (21.6 in) long. The development of the series began in the late 1970s ...

~~Toyota A engine — Wikipedia~~

In an internal combustion engine, a crankcase ventilation system removes unwanted gases from the crankcase. The system usually consists of a tube, a one-way valve and a vacuum source (such as the intake manifold). The unwanted gases, called "blow-by", are gases from the combustion chamber which have leaked and pass through the piston rings.

Hi all, My 1998 Avensis 1.8 (7AFE lean burn) has used Oil for the whole time (coming up three years) I have owned it. I change the Oil every six months which is 4,000 miles ish. In that six months I add the remainder of the 5L of Oil (just over a Litre) bought to do the Oil change as the level on the stick drops. By six months the dipstick shows Oil at the minimum mark and the 5L container ...
